I. INTRODUCTION

Magento Banner Rotator is an extension featuring multiple transitions. The thumbnails and buttons allow for easy navigation of your banners. The banner rotator is also re-sizable and configurable through the plugin's parameters and stylesheet. You can place the banner rotator in any CMS page, category and product you want and which a lot of position.

Features:

- Multiple transitions available, can set a different transition per image.
- Able to load unlimited number of images, each with customizable text description, tooltip, and hyperlink.
- Show or hide components, including play button, directional buttons, thumbnails, text panel, and tooltip.
- Can set to automatically play on startup with customizable timer delay, can set a different time delay for each image.
- Banner, thumbnails, and buttons are all resizable.
- Text description panel can be set at different location, width, height, color, and background color.
- Embed html tags within the text panel.
- Control panel can be set at different location.
- Configurable image or text tooltip for each thumbnail.
- Can set text description and control panel to appear on mouseover.
- Transition block and stripe sizes are configurable.
- Able to shuffle image in random order.
- Support for mouse wheel scrolling.
- Support for iOS and android devices.

II. INSTALLATION

a. System Requirements

- Support Magento Community Edition 1.4.1.1, 1.4.2, 1.5, 1.6, 1.6.1, 1.6.2.0, 1.7, 1.8
- All4coding Core v2.0.0

b. Installation

- Login to Magento Admin Panel
- Go to **All4coding > Extension Manager**
- Click the Install button of the extension and follow the instruction on the installation wizard to install the extension. Please Read All4coding Core Manual for more information.

VI. CONFIGURATION

Go to All4coding > Banner Rotator > Configuration

The screenshot shows the Magento Admin Panel interface. At the top, there's a navigation bar with the Magento logo and 'Admin Panel' text. A search bar labeled 'Global Record Search' is present. The user is logged in as 'nguyen' on Friday, June 15, 2012. A message bar indicates a 'Latest Message' about improving Magento Store Search with All4coding Google Custom Search Extension.

The main navigation menu includes: Dashboard, Sales, Catalog, Mobile, Customers, Promotions, Newsletter, CMS, Reports, System, All4coding, and a 'Get help for this page' link. The 'All4coding' menu is expanded, showing a list of settings: Featured Products, New Products Settings, Discount Products Settings, Price Timer Settings, Fun Supersized Settings, Google+ Settings, Facebook Settings, Banner Rotator, Google Custom Settings, Maintenance Settings, and Sort Direction Settings. The 'Banner Rotator' option is further expanded to show 'Slider Manager' and 'Configuration'.

The 'Dashboard' section is visible on the left, showing 'Choose Store View' set to 'All Store Views'. It includes summary cards for 'Lifetime Sales' (\$0.00) and 'Average Orders' (\$0.00). Below these is a table for 'Last 5 Orders' with columns for Customer, Items, and Grand Total. The table shows one order from 'Test Man' for 1 item with a total of \$85.00.

The main content area shows a 'No Data Found' message, likely due to the expanded menu overlaying the content.
